**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-24, drawn to a server computer for use in a computer network having at least one client computer, the server computer characterized in that the server computer: sends media assets over said computer network to said client computer, the server computer coupled to at least one file system organized into a plurality of asset groups, each asset group comprising at least one media asset, the media asset sharing storage medium bandwidth and storage space on the server computer that is reserved for the asset group to which the media asset belongs, classified in class 709, subclass 226.
  - II. Claims 25-32, drawn to a method for administering storage space and storage bandwidth of media assets stored on a server computer system, the method comprising: creating an asset group, the asset group providing shared storage space and storage bandwidth on a server computer system for media assets, the server computer system capable of connection to a computer network and communicating with a client computer system over the computer network; calculating a resource quota, the resource quota specifying storage space and storage bandwidth available to the asset group; assigning the asset group to at least one file system; installing at least one media asset in the asset

group; and making the media asset available for transmission to the client computer system over the computer network, classified in class 709, subclass 232.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another materially different apparatus such as a server computer system without calculating a resource quota.

3. A telephone call was made to Michael Ananian on September 28, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
